VERONA SET

SETUP GUIDE

USER GUIDE

*Installation should be done so that the arrow signs coincide with each other.

1- The product you have purchased is very practical in terms of installation. out of the box It will be ready for use with the placement of the arm, back part and cushions attached to the lower chassis. The most important factor in the placement of the arm and back is that **the arrows** are mutually aligned as shown in the figure must match each other.

2- Place the arms coming out of the box as in the figure above, and put them in their places. Lift the arm slightly upwards until it reaches the right position when screw holes match exactly.

3- By placing the back part coming out of the box as in the figure above, seat them. Slightly backwards until the screw holes line up exactly. Make sure that the back comes to the right position by pushing it.

4- Ensure that the arm and back parts are fully seated. Out of the parcel after making sure screw them in place with screws.

5- If the product has two or more sessions, the arms will be placed next to each other. Complete the installation as shown on the side without mounting. With the fastening apparatus as in the figure below, which comes out of the box engage the seats and make sure they are locked.
